2

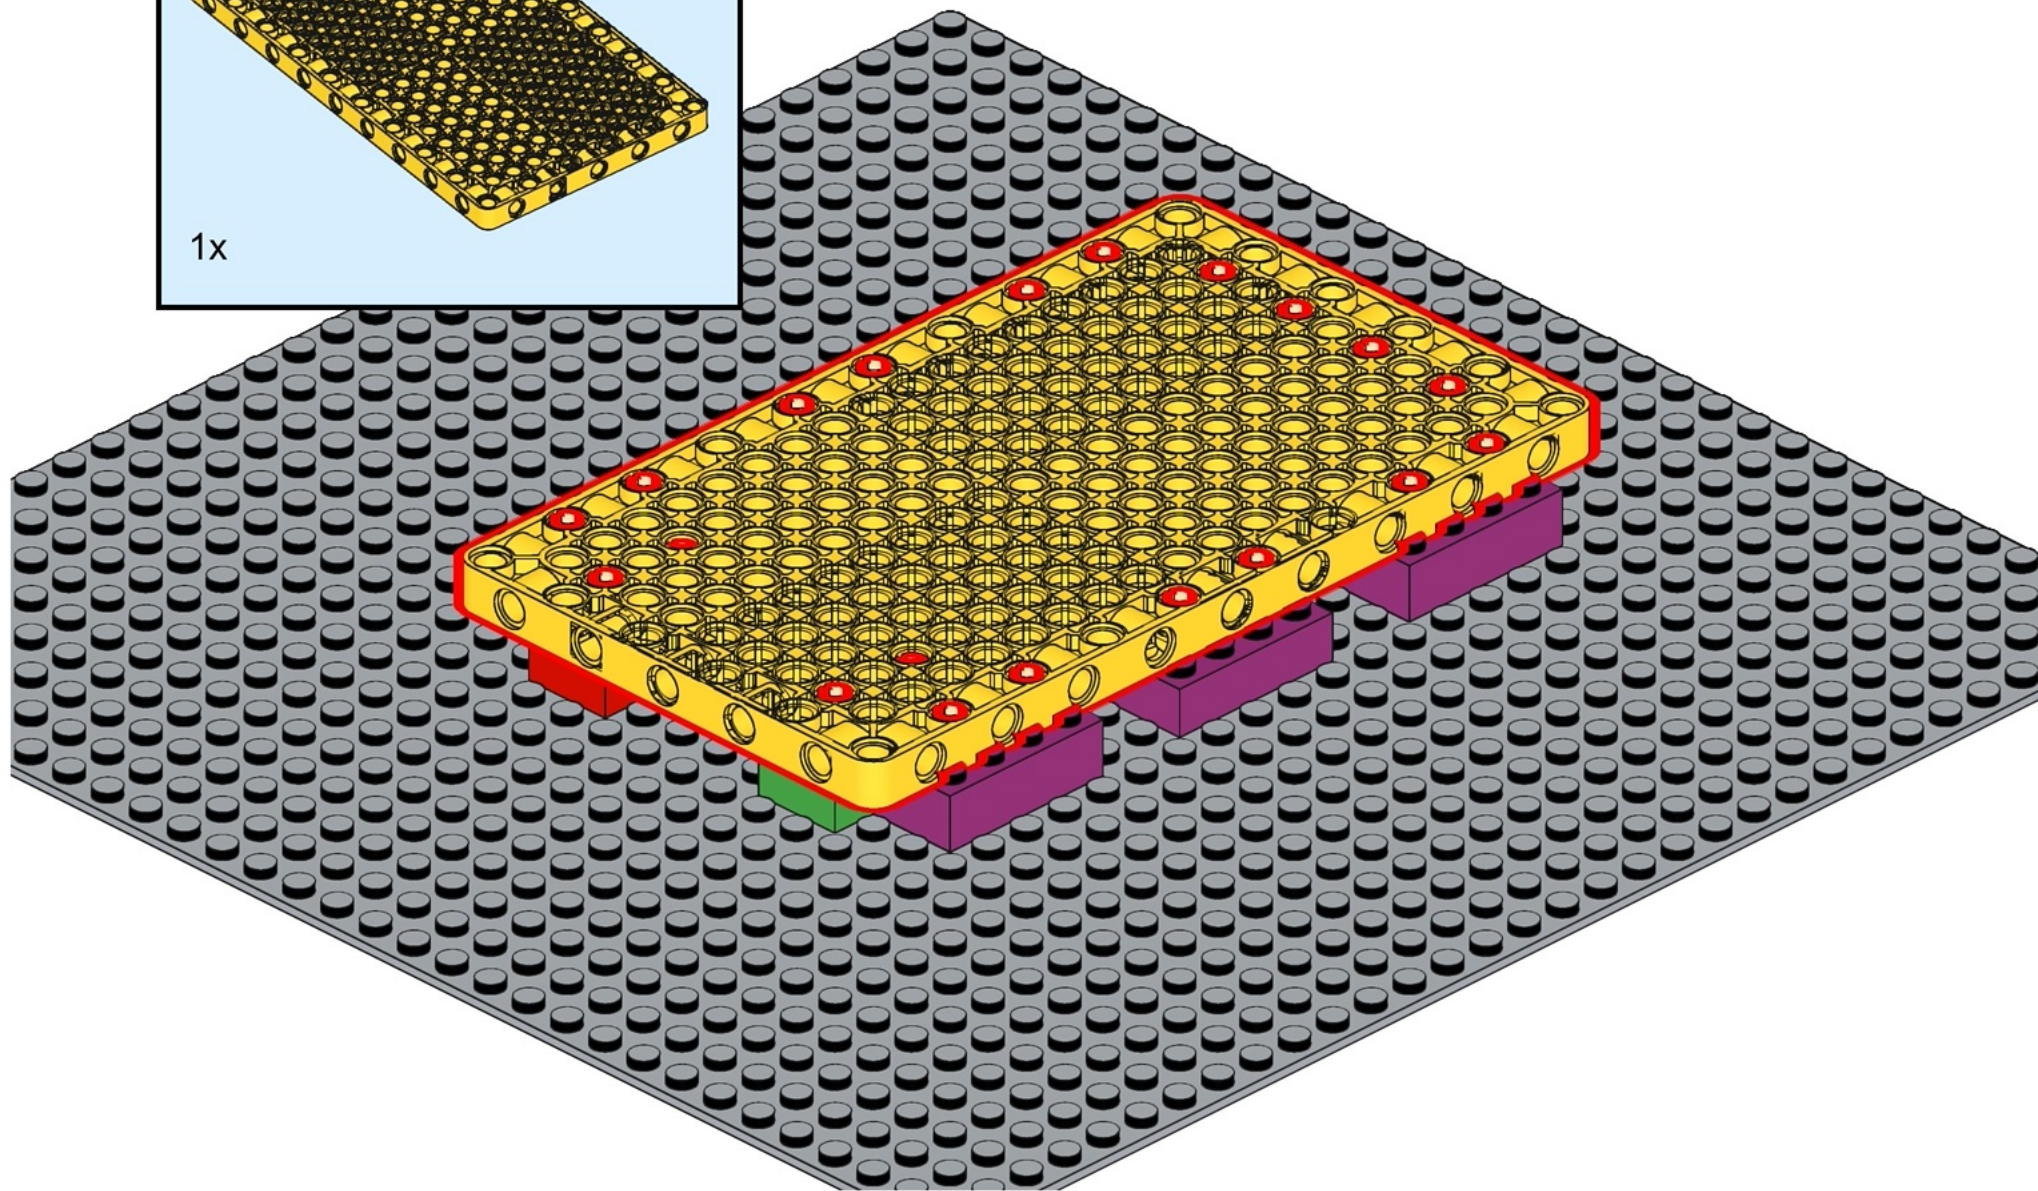

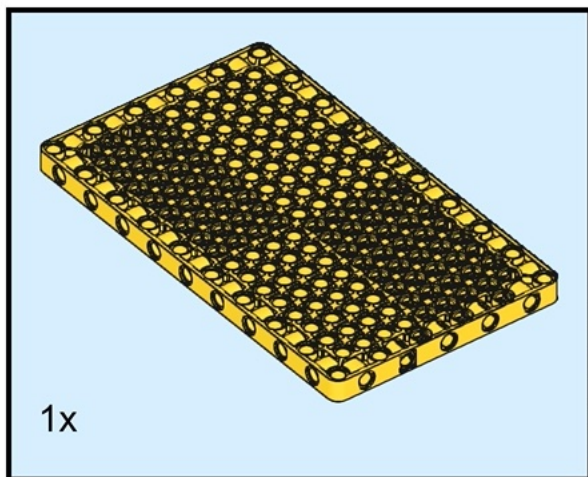

Note: The front bricks (red and green) are placed on the *9th* stud from the front of the baseplate, and *13th* stud from the sides of the baseplate.

3

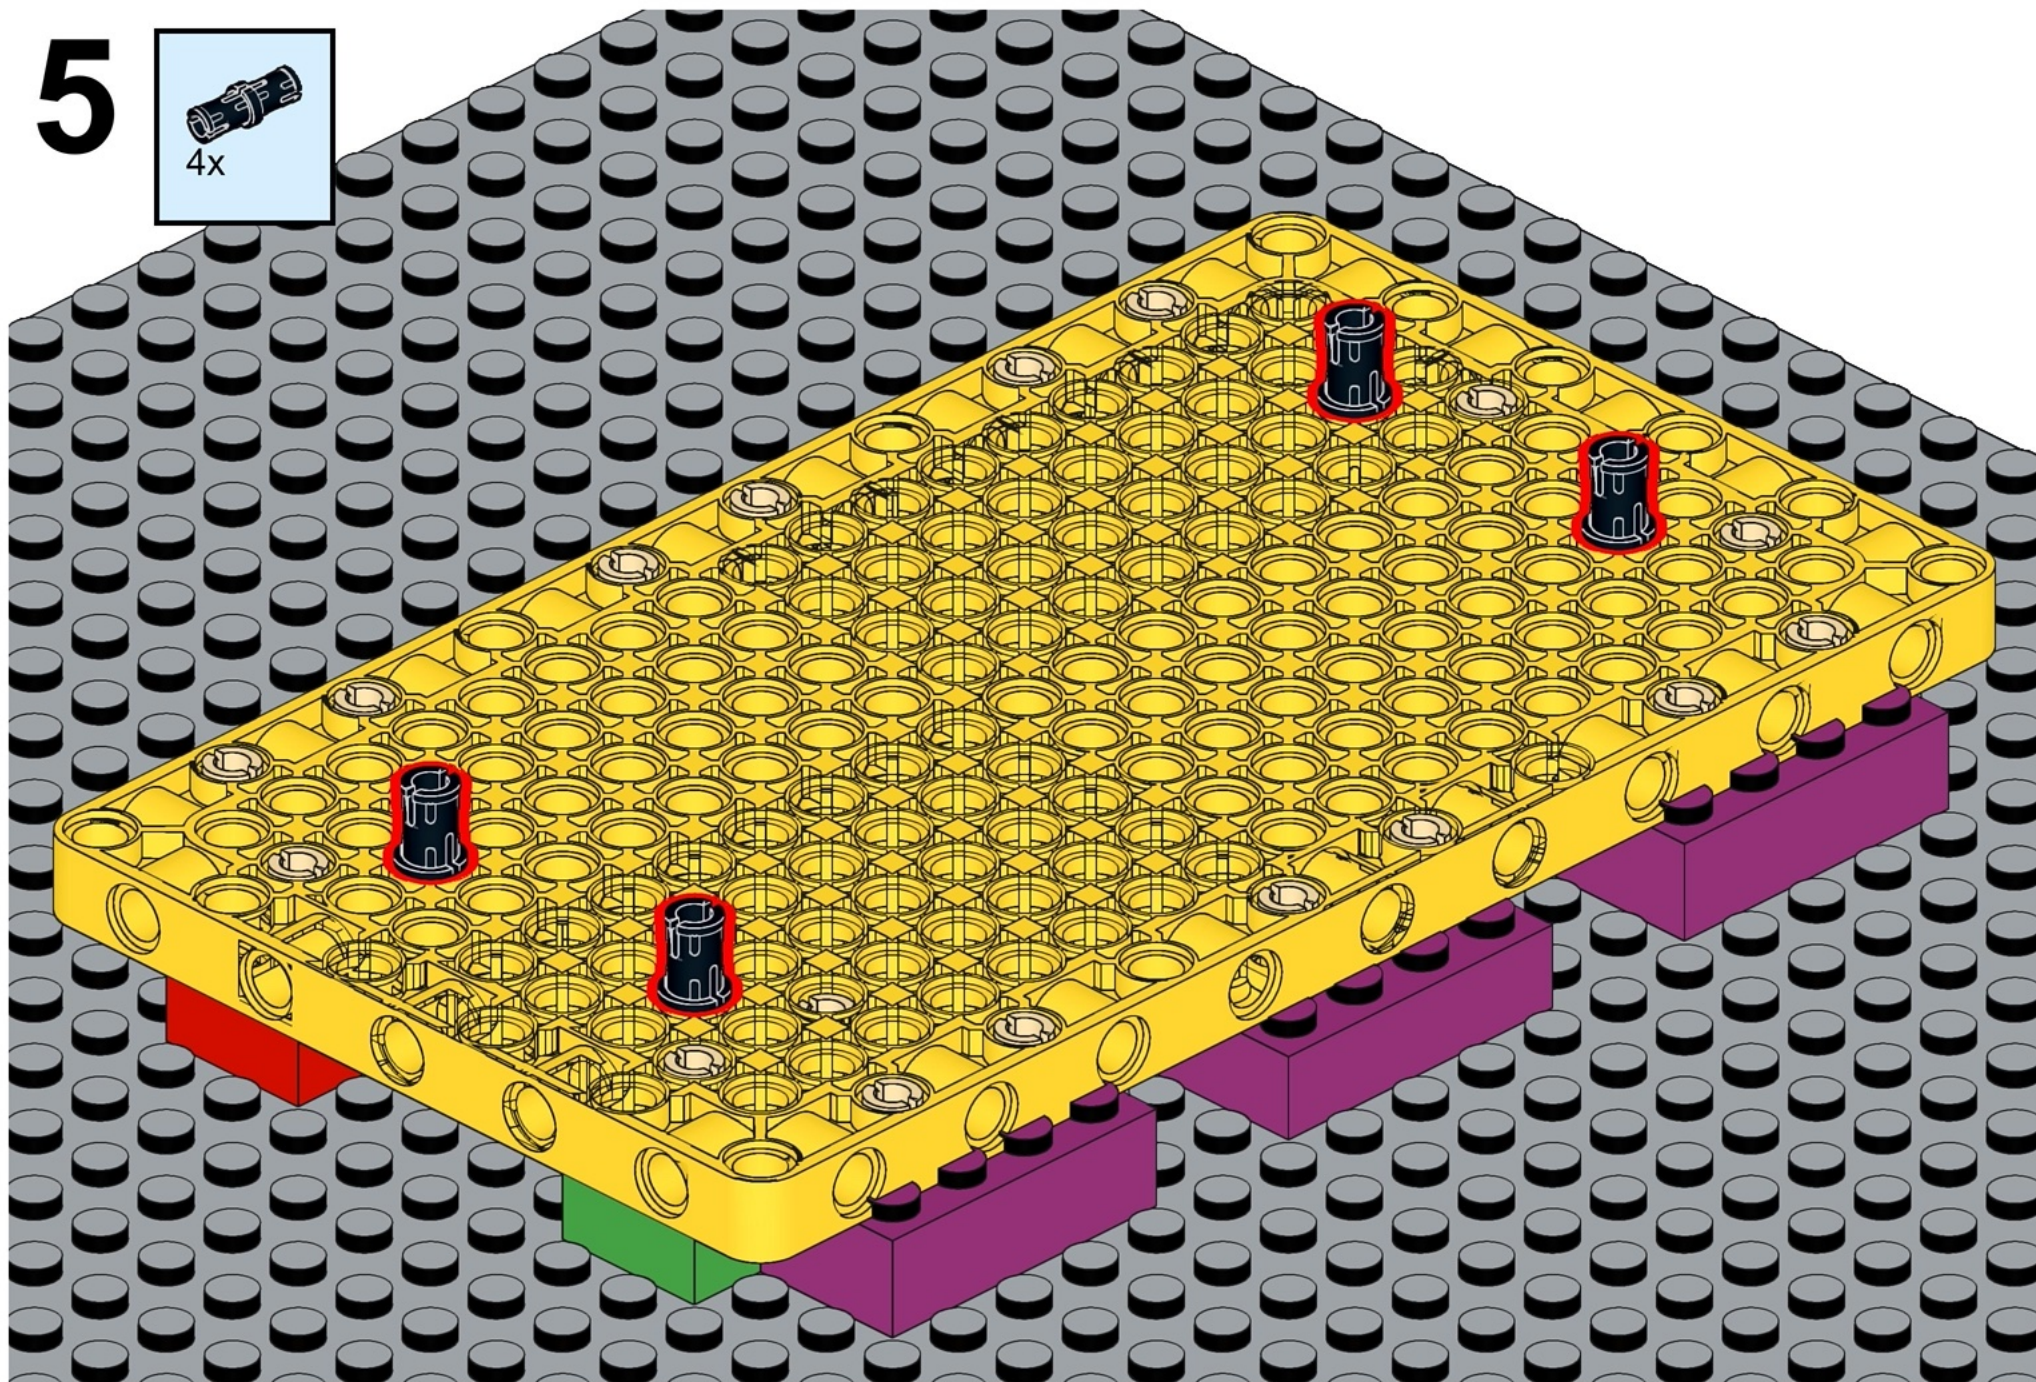

Note: For extra stability, insert the tan-colored connectors into the yellow base-board (seen in the next step) first, and then insert the connectors into the bricks.

25

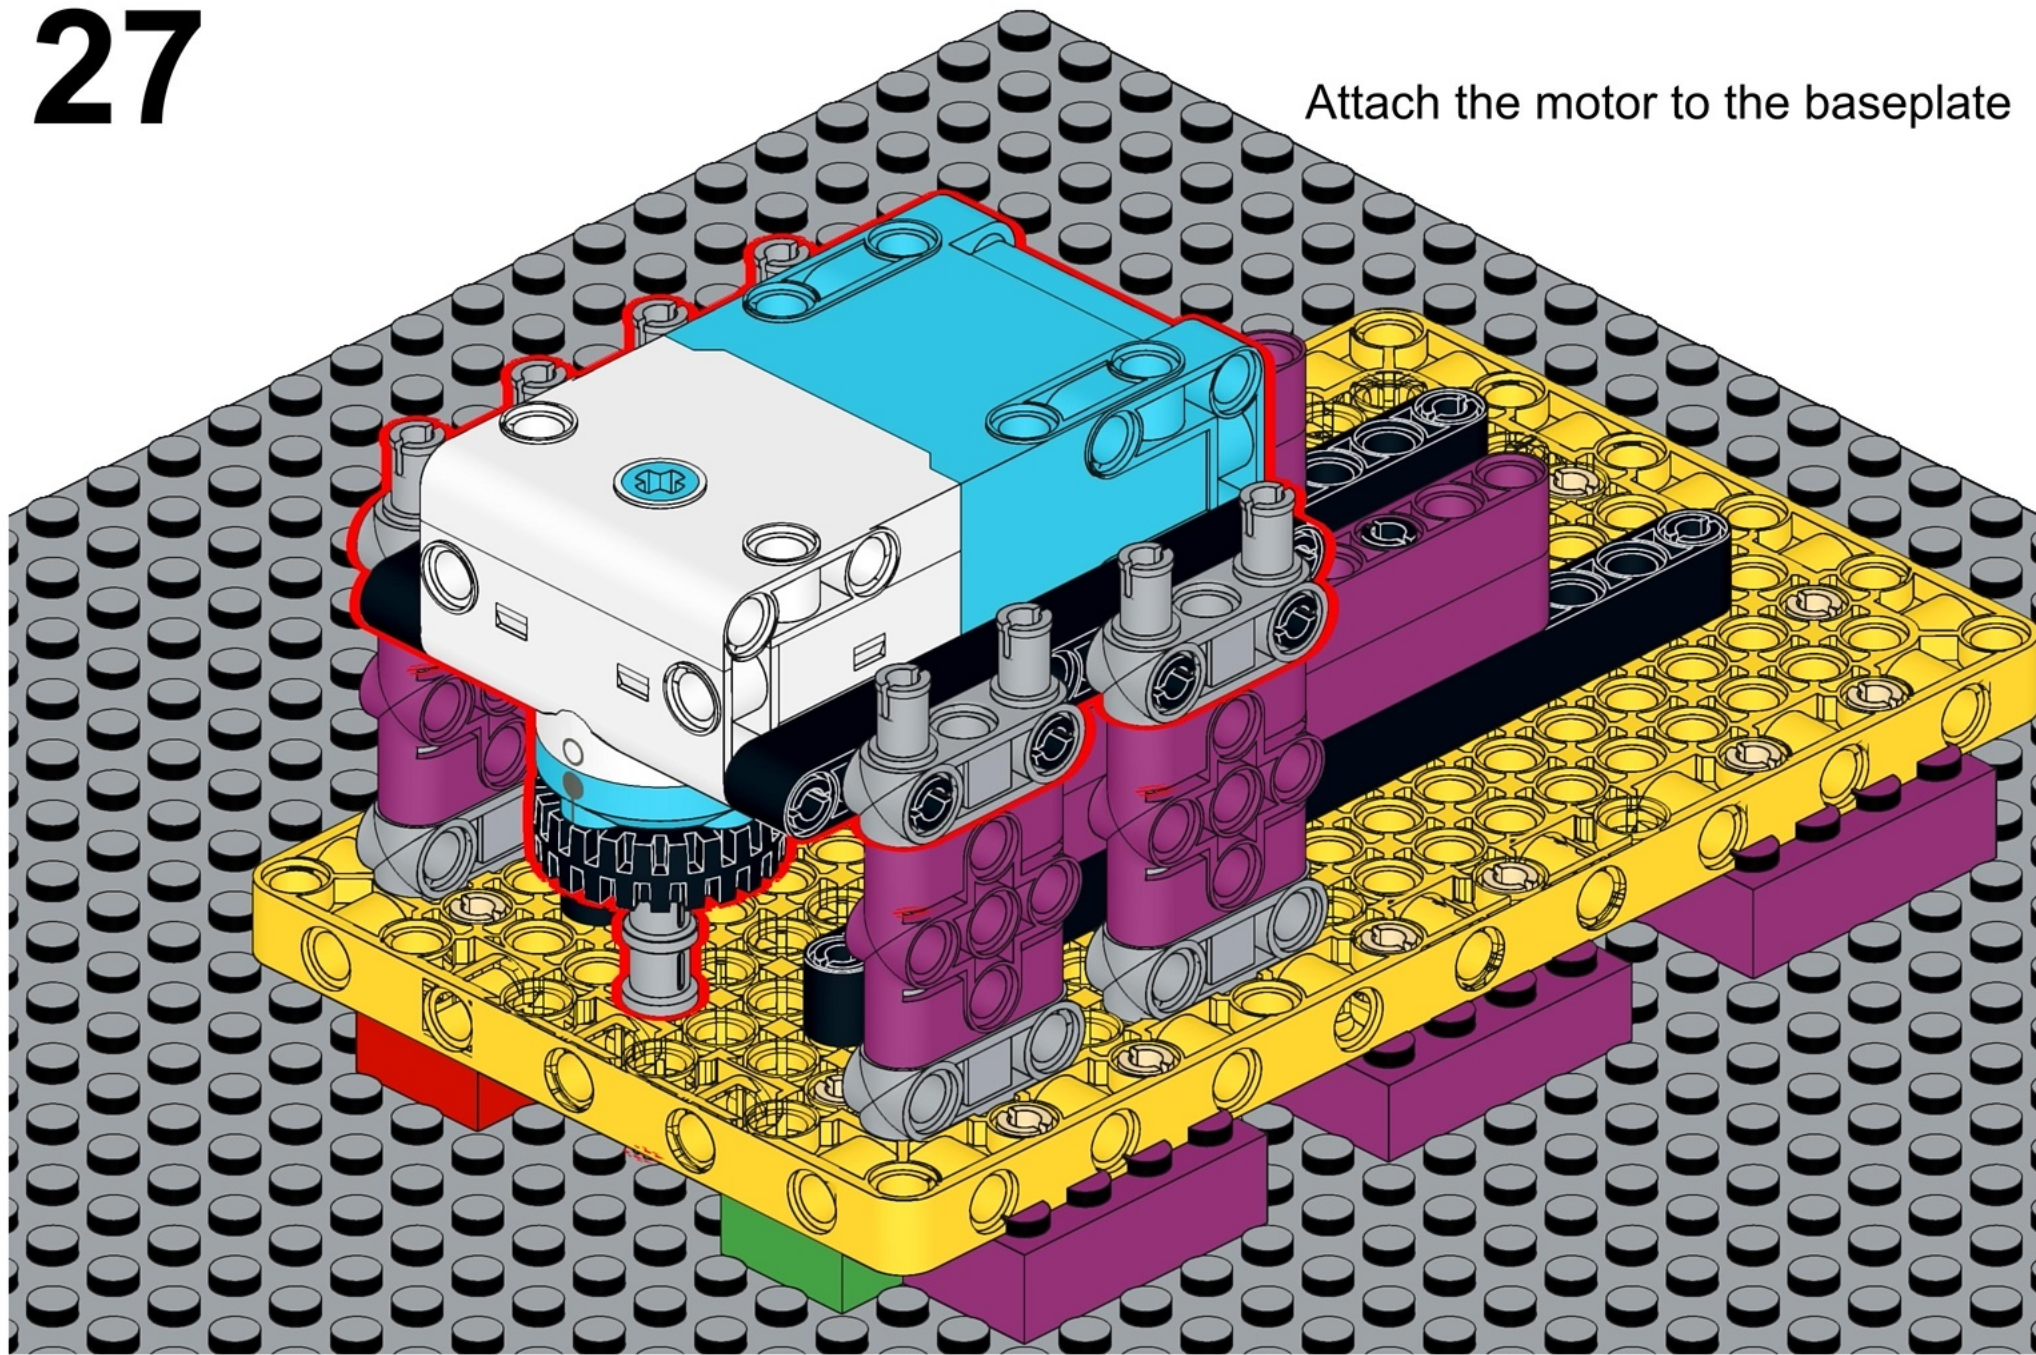

NOTE: You will NOT be using this pictured tire. Please use the alternate tire and coupling we list in the supplementary materials.

26

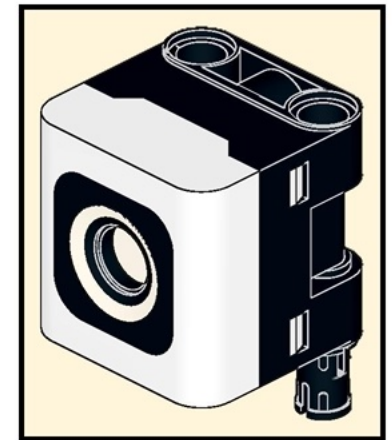

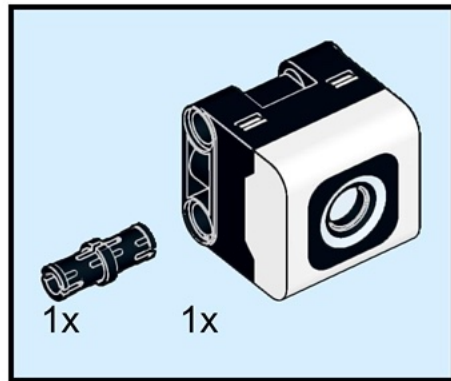

27

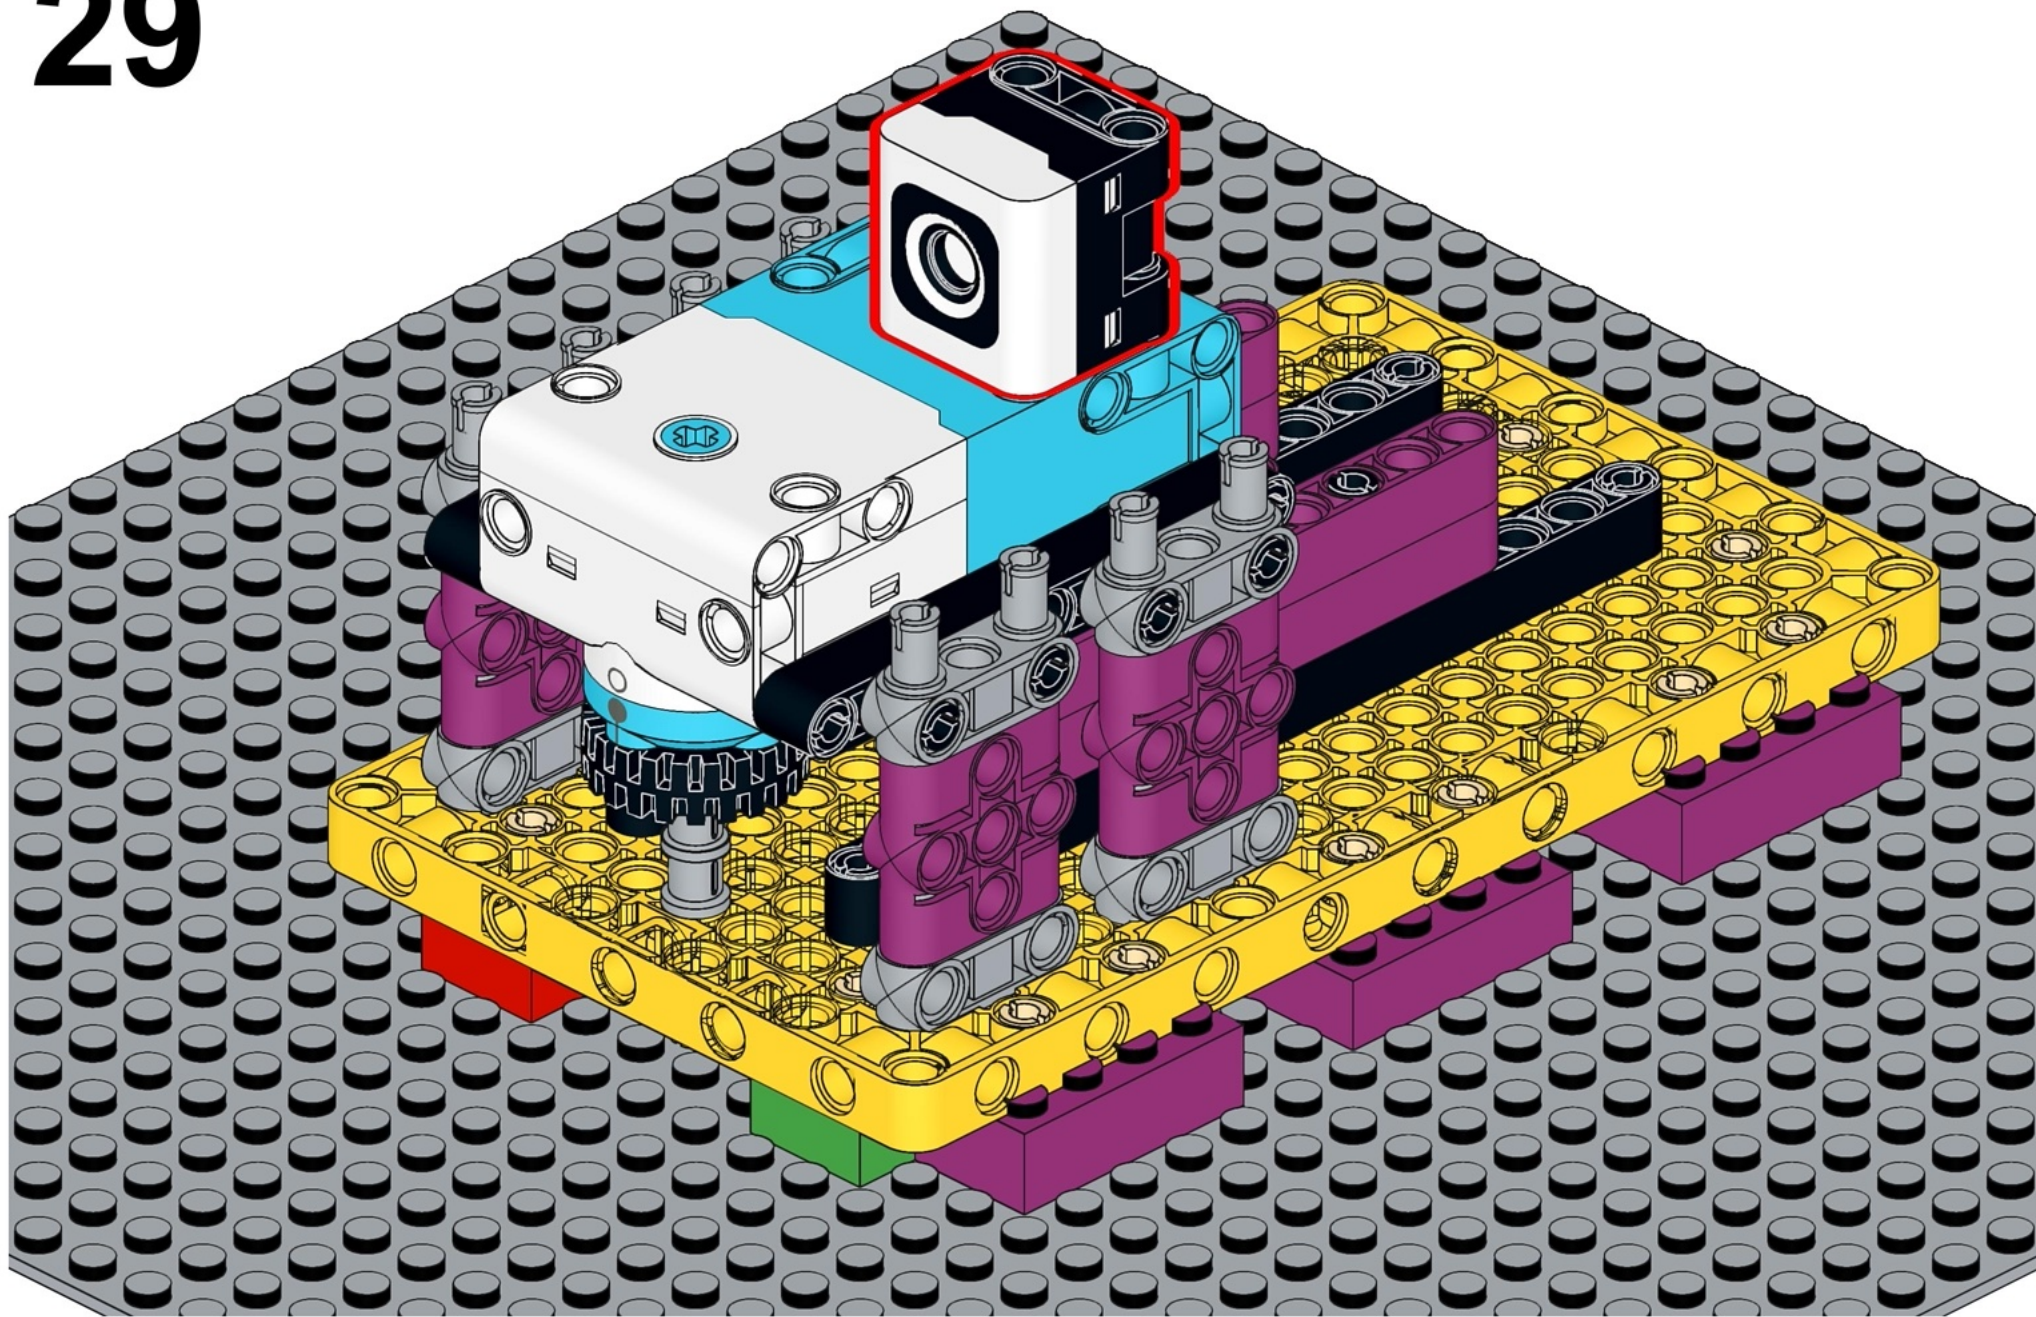

Attach the motor to the baseplate

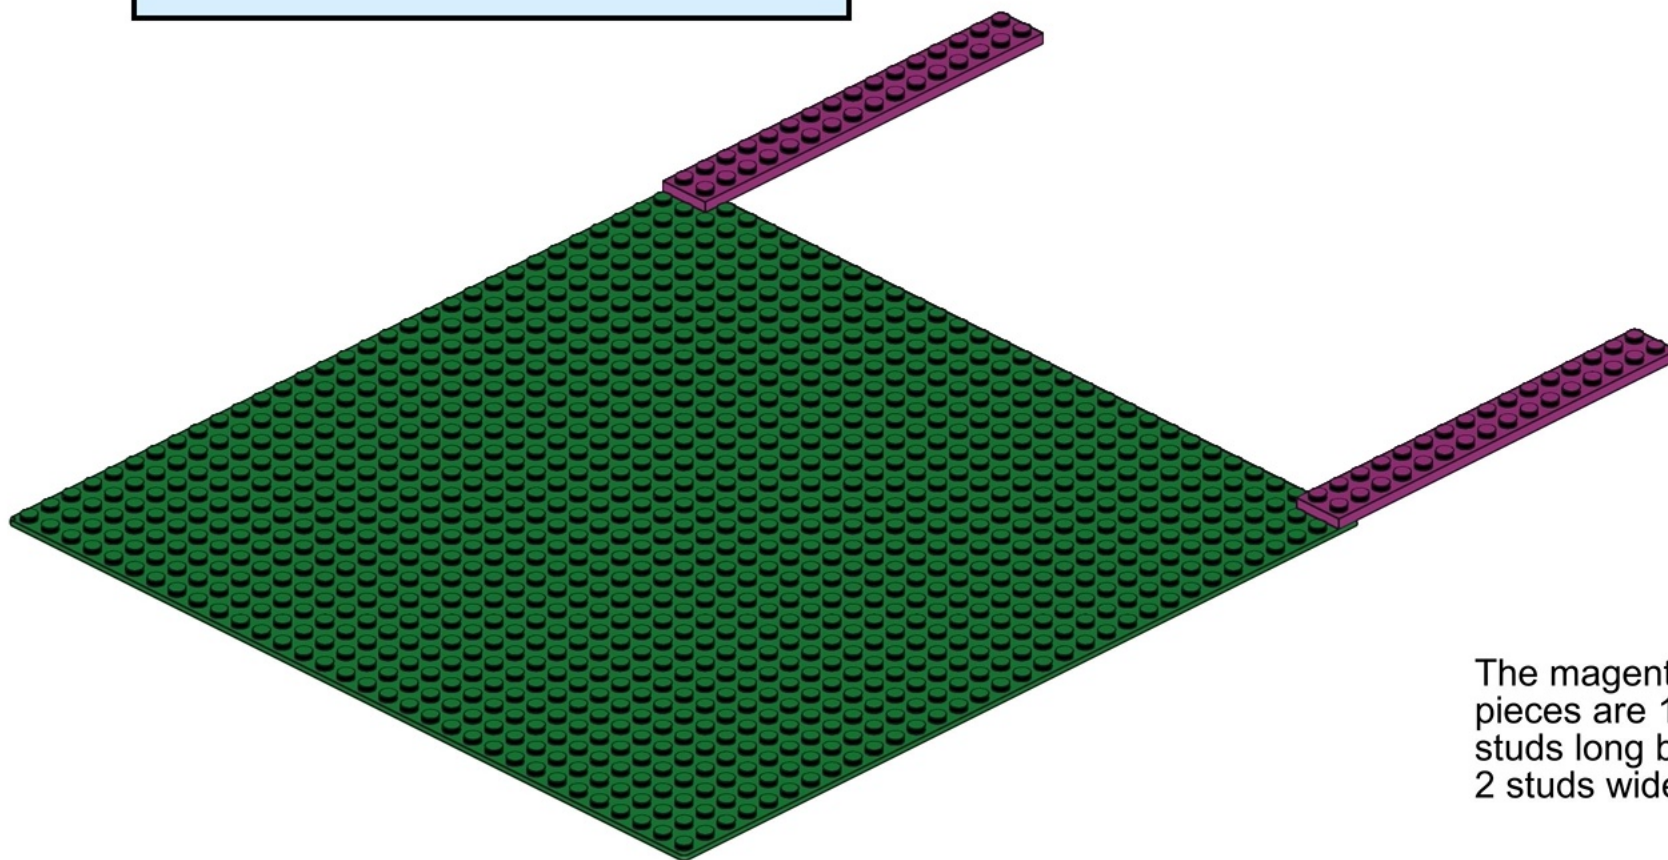

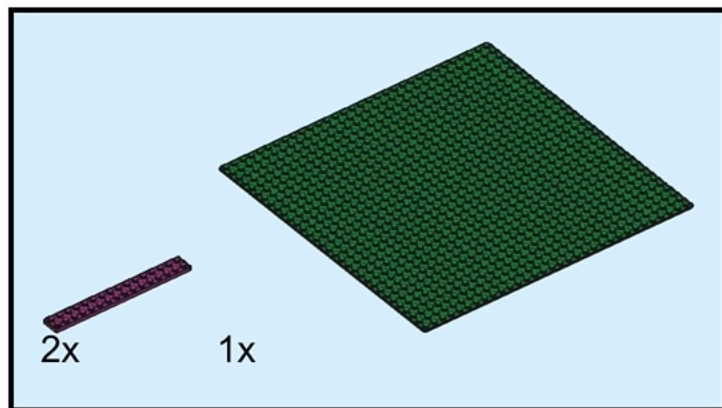

28

29

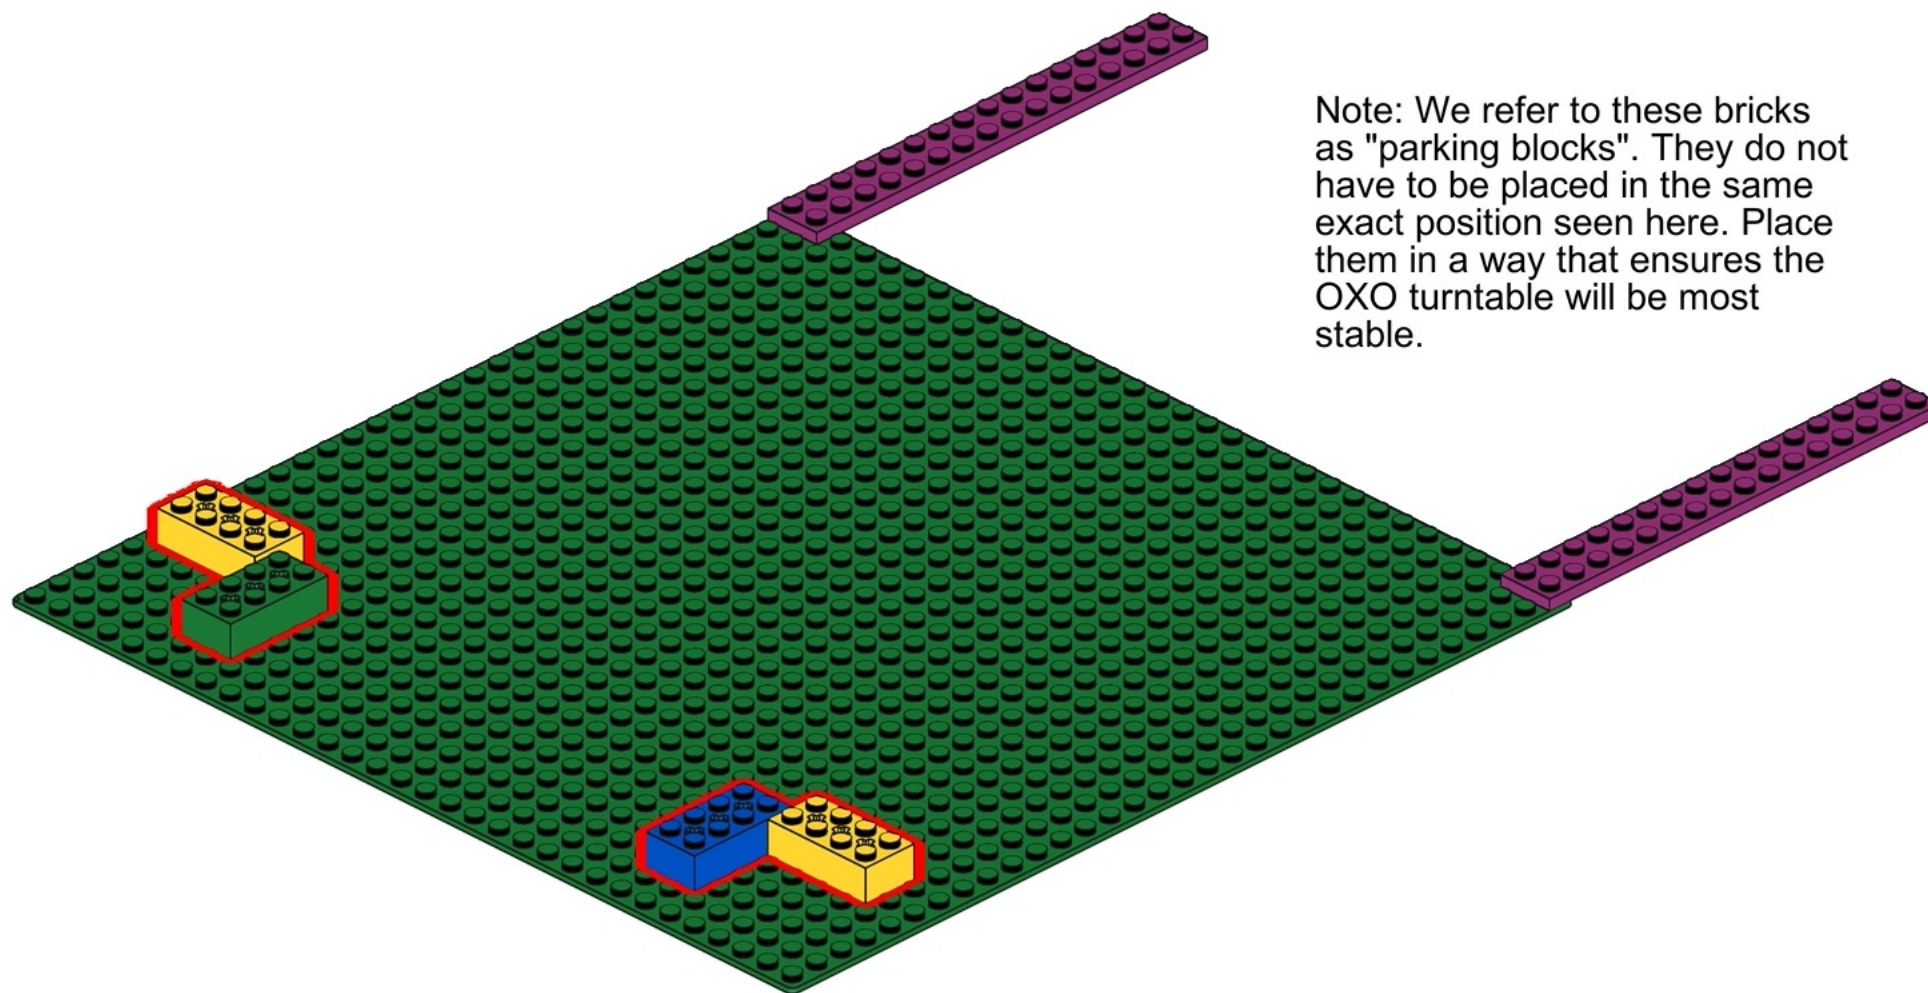

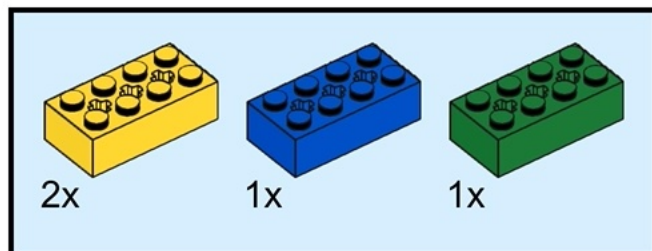

30

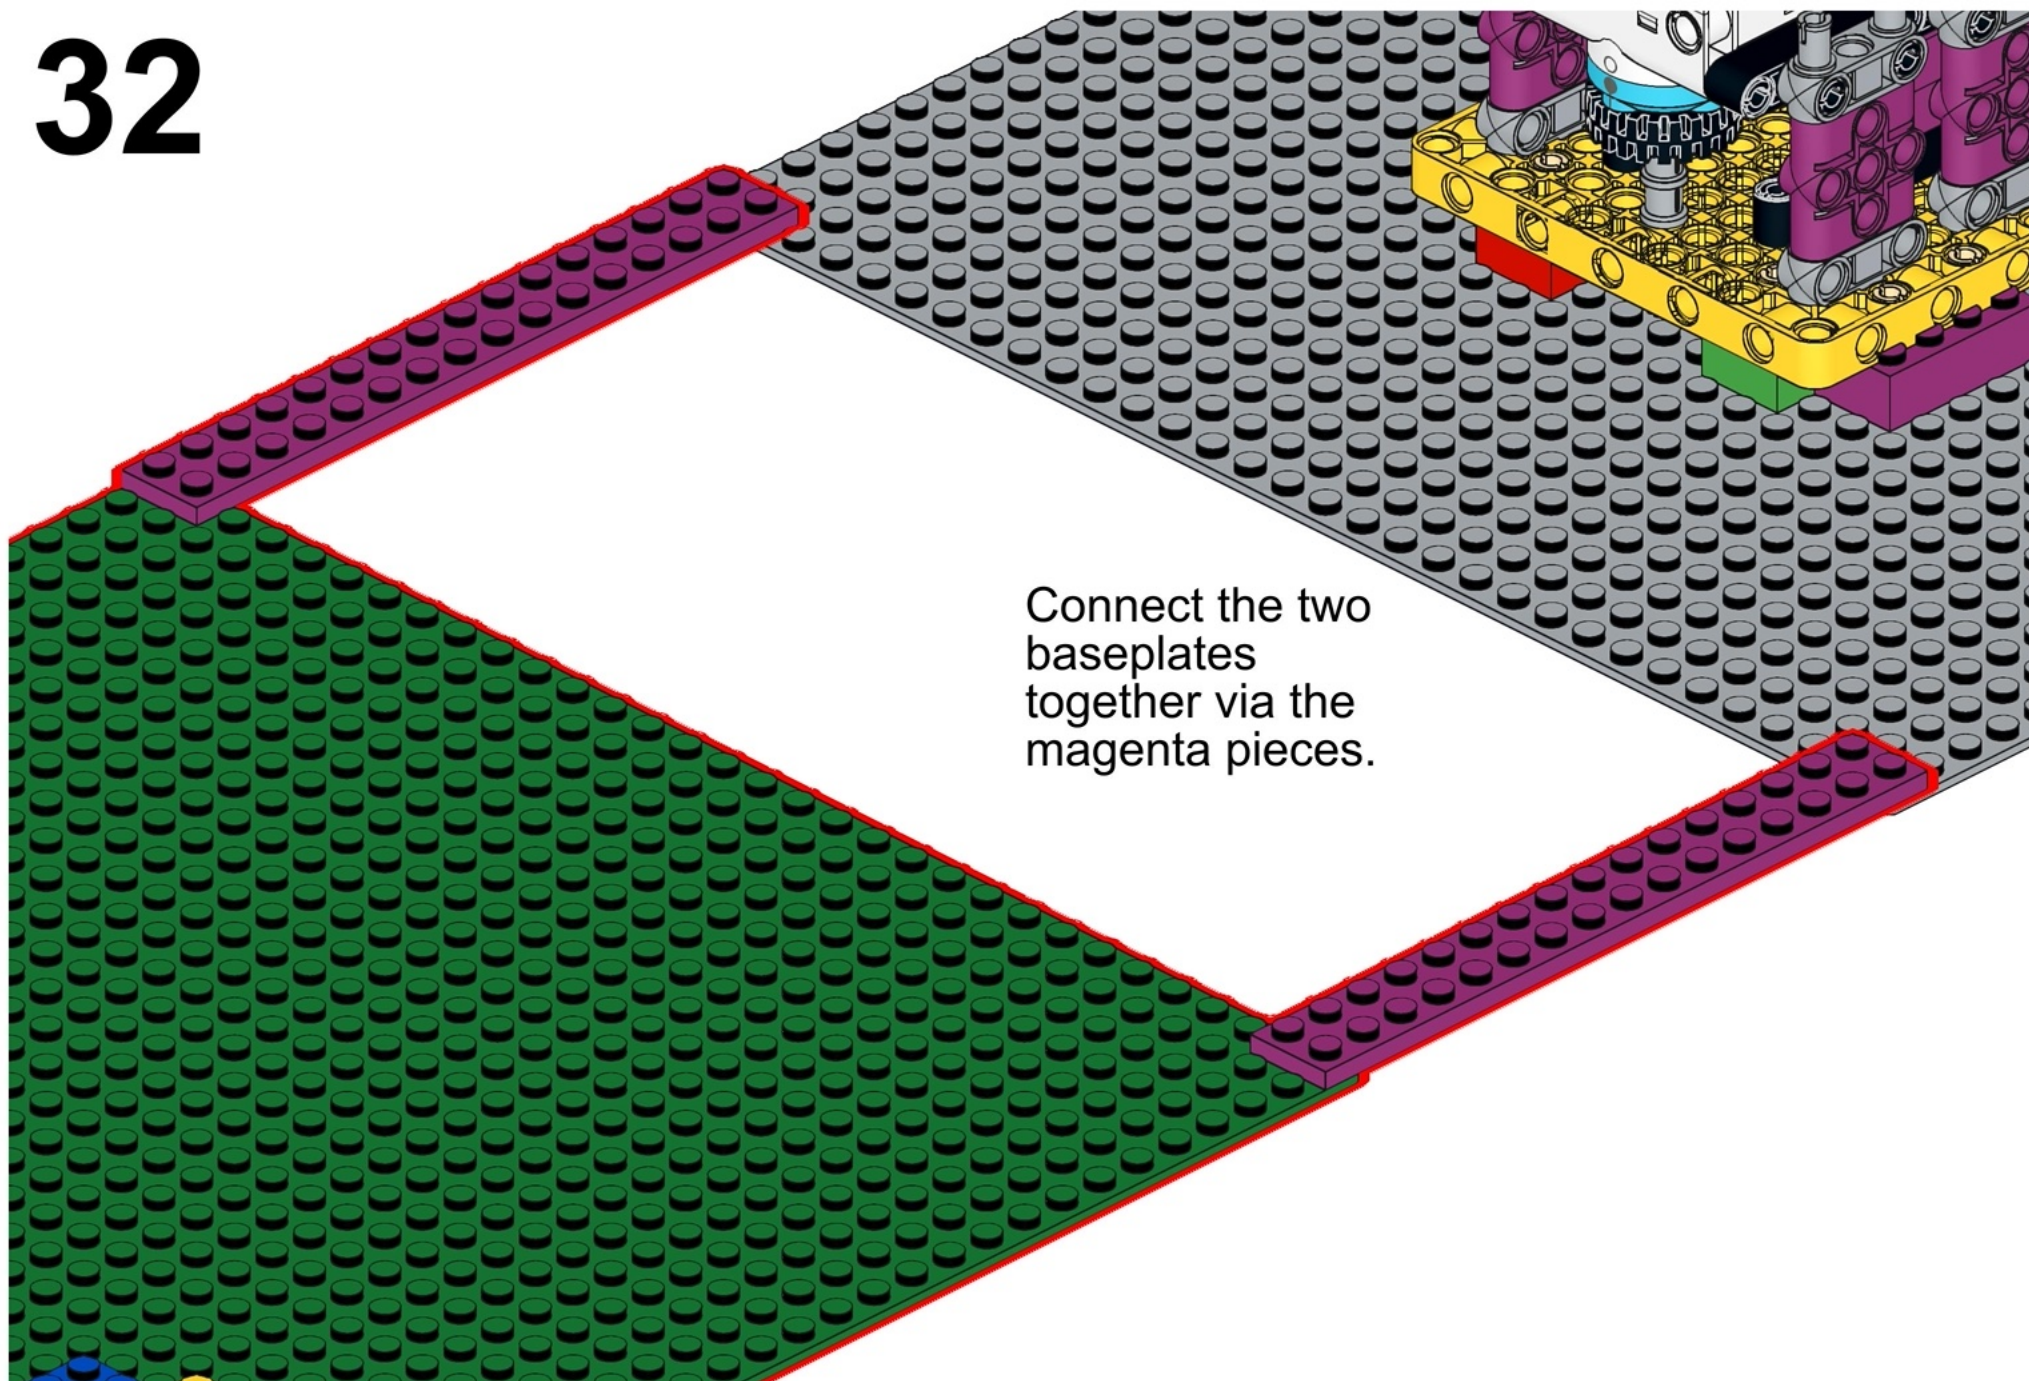

The magenta pieces are 16 studs long by 2 studs wide.

31

Note: We refer to these bricks as "parking blocks". They do not have to be placed in the same exact position seen here. Place them in a way that ensures the OXO turntable will be most stable.

32

Connect the two
baseplates
together via the
magenta pieces.
